

## **HOW TO COLLECT URINE FROM YOUR CAT AT HOME**

### **Cat Box/ Garbage Bag Technique**

- 1) Put your cat in the bathroom.
- 2) Remove all rugs and towels.
- 3) Take a litter box with litter and place it inside a garbage bag. Do this as if you were going to throw the litter and box away. The cat will be able to feel the litter but urinate on the plastic.
- 4) When the cat urinates on the bag, collect it with the syringe provided and place in the urine cup.

### **Nosorb Method**

- 1) Put your cat in the bathroom.
- 2) Remove all rugs and towels.
- 3) Fill a **clean** litter box or other receptacle (aluminum roasting pans work very well!) with the nosorb litter. The cat will use it just like normal litter only it won't absorb the urine.
- 4) When the cat urinates in the box, collect it with the syringe provided and place in the urine cup.

**Get the urine to us within one hour. If you can't get it to us in that amount of time, place it in the refrigerator. You must get it to us within 24 hours for us to process it.**
